

TECHNOLOGY @ BHU

BHU embraces technology, as it is one of the most utilized tools in higher education. As an institute of higher learning, BHU encourages our students to utilize the technological tools offered in effort to increase effectiveness in the student's academic pursuit. The usage of technology has been integrated within the curriculum, enhancing the overall classroom experience. This usage broadens research, enhances communication, and provides university wide connectivity.

Student Access

BHU has made advances to ensure that students have access to adequate and reliable technology throughout the campus. Several computers are available throughout the campus for student usage, including a computer lab, student activity center, and help stations, as well as the Library. BHU also recognizes that some students may want to utilize their personal computers. Therefore, an on-campus infrastructure for connecting through Wi-Fi connection is available to all students on campus.

BHU Student Portal

Each student, upon acceptance at BHU, is assigned a student portal. This portal allows students to actively engage with their academic life at the university. Students will have access to grades, attendance, billing, classes, registration, and much more. This system provides real-time access for the student to their record. The student will also have access to their very own website landing page, which provides a gateway to other technological tools provided by the university.

Email

Each student is assigned an email account upon acceptance and provided instructions for utilization. All university correspondence will be sent to this account.

Financial Aid Portal

The Financial Aid Portal streamlines the entire Financial Aid packaging (award letter), disbursement information, and document tracking (for review and verification purposes). Students are added to the Financial Aid Portal by the Financial Aid Office once students have completed the first initial steps of the Financial Aid checklist (the FASFA, Entrance Loan Counseling, and Master Promissory Note). The Financial Aid Portal is a direct connection to our processors, which allows students to see their Financial Aid overall status.

The Financial Aid Portal also provides students with their award letter which displays the total amounts awarded for that awarding year. Students will receive updates and status notifications via their BHU email address.

BHU D2L

Beulah Heights University's Department of Digital Learning is proud to partner with Brightspace by D2L to offer a vibrant digital learning experience. Brightspace is a learning management system that uses a combination of effective tools, resources, and support to offer the best experience to students and faculty. Recognizing educational accessibility, interactivity, and enhanced engagement as its primary pillars, BHU Brightspace offers the perfect combination of learning and technology.

Bongo Virtual Classroom: Bongo virtual classroom is integrated software that allows BHU to offer synchronous digital learning through premier web conferencing technology. Virtual classroom allows students an opportunity to engage faculty and peers using technology that makes peer to peer and faculty to student engagement interactive and appealing.
